Geological Methods in Mineral Exploration and Mining by ...

Prospecting is the first stage of the geological analysis of a territory. It is the search for minerals, fossils, precious metals or mineral specimens, and is also known as fossicking. Traditionally prospecting relied on direct observation

Seismic methods can be also used for mineral exploration, since they can provide high-resolution images of geologic structures hosting mineral deposits. It is not just surface seismic surveys which are used, but also borehole seismic methods. All in all the usage of seismic methods for mineral exploration is steadily increasing.
