Online SMS PDU Decoder/Converter | Diafaan SMS Server

When using the GSM encoding, the 7bits characters must be packed into 8bits bytes. This allows the SMS to hold 160 Latin characters in its user data field. The 7 bits binary representation of a character is called a septet and the 8bit binary representation is called an octet.

Encoding / Decoding 7 bit User Data for SMS PDU (PDU Bit ...

Because of the limitation of the SMS number of character, the GSM 7bit encoding is used. While with regular 8bit encoding, the maximum number of octets the SMS may have is 140, with the GSM 7bit encoding it is possible to send 160 octets. The idea of the 7bit encoding is that each character represented by a septet.
