1. No lye, no soap. Although you don't leave any lye in your soap, the lye is needed to make soap. Even the most basic melted and dumped soap is made with lye. 2. The oils in the formula are the main factor that determines the quality of the final soap. So please use a good quality oil in making soap. Oils. 3.

## **DIY Soap Making - Quick Start Guide - DIY Smart Ideas**

The scariest thing for me when I first started making soap was working with lye. Lye – also known as sodium hydroxide – is a necessary part of making homemade soaps. Without lye, there simply is no soap. You must have a fat – your soapmaking oils and butters – and an alkali – sodium hydroxide – to make soap. When

There are four methods of making soap, two of which are the most common.

### **Learn How to Make Homemade Soap - The Spruce Crafts**

Stearic acid is a fatty acid that has no glycerol bond, unlike the other oils and fats commonly used in soap making. Because there is no bond that needs to be broken, our stearic acid will immediately react with the lye. The stearic acid creates potassium stearate, a soap that provides a full, white, thick and stable lather.
