## Biodiversity **Review ...**

The simplest and most common measure of biodiversity is the number of species that live in a certain area. For example, one acre of farmland may be dominated by only one species of plant; one acre of rain forest may contain 400 species of plants.

## Biodiversity

Loss of Biodiversity:

**-Extinction:** the elimination of a species  
99% of all species that have ever existed are now extinct! **-Natural Causes of Extinction:** in an undisturbed ecosystem. Mass extinctions (that wiped out dinosaurs at the end of the Cretaceous period and two thirds of all marine life at the end of the Permian period) were caused by
